Following is the list of ICT tools used:-

- **Laptops/Smart Devices:** All offices and departments are equipped with a sufficient number of desktop computers. The central computer lab features high-performance computer systems connected to high-speed internet, along with the latest software for training and teaching.
- **Classrooms with ICT Tools:** The college offers ICT-enabled classrooms and smart classes equipped with LCD/LED projectors, computers, and microphones. The college also has smart classrooms and lecture/seminar halls fitted with the latest ICT technology.
- **Wi-Fi:** ANCP provides secure Wi-Fi access for all students and teachers. Each user has a unique username and password, and the Wi-Fi is accessible from anywhere within the college.
- **E-Resources from the Library:** Students have access to a variety of e-resources and journals through the library, which has subscribed to online databases like KNIMBUS, TLSS.
- **ICT Tools Used for Teaching:** Many teachers use platforms like YouTube, Google Meet, and Google Classroom to communicate, share materials and syllabi, make announcements, conduct tests, and upload assignments. Faculty members also use IT-enabled learning tools such as PPTs, video clips, and online sources to enhance knowledge and practical learning.
- **Content Creation Tools:**
Presentation Software: Tools like PowerPoint, Prezi, and Canva helped teachers create visually appealing and informative presentations.
- **Screen Recording and Video Editing Tools:** Software like OBS Studio enabled teachers to create and share lecture videos.
- **E-Resources Available Online:** Students have access to a wide range of e-resources on educational websites like SWAYAM, e-PG Pathshala, National Digital Library, Shodhganga, Vidwan, NPTEL, Coursera, and the UGC online lecture series.
- **Assessment and Evaluation:**
- **Online Quizzes and Exams:** Tools like Google Forms, Quizlet, and other online assessment platforms allowed for timely and efficient evaluations.
- **Automated Grading Systems:** These systems saved time and provided instant feedback to students.
- **Storage and Backup:** Using cloud storage solutions like Google Drive or Dropbox ensured that educational content was accessible and secure.

Methodology employed: Teaching through Virtual tools such as

- Swiss dock
- Swiss ADME
- Auto Dock
- Openbabel
- Chempidder
- Chemdraw
- E-learning resources

S. No	Name of the software	Category	Applications
1.	AutoDock 4.2.0	Opensource	AutoDock 4.2.0 is a widely used molecular docking software developed by the Scripps Research Institute. It is designed to predict the preferred orientation of a small molecule (ligand) when bound to a large molecule (typically a protein or DNA)
2.	Way2drug	Opensource	The Way2Drug informational-computational platform provides access to the data on drugs approved for medicinal use in the USA and Russian Federation, as well as computational possibilities for the prediction of biological activity of drug-like organic compounds
3.	Open babel	Open source	Open Babel is a chemical informatics toolkit that allows for the conversion of chemical file formats, analysis, and manipulation of molecular structures. It is widely used in computational chemistry, bioinformatics, and cheminformatics due to its flexibility and broad compatibility with various chemical data formats.
4.	OBS	Open source	OBS , short for Open Broadcaster Software , is a popular free and open-source software suite used for video recording and live streaming. OBS Studio, its most commonly known version, is favored by gamers, content creators, educators, and professionals for its versatility and wide range of features.
5.	Swiss Dock	Open source	Molecular docking between ligand and receptor
6.	Swiss ADME	Open source	Prediction of ADME properties
7.	PaDEL	Opensource	Calculation of different descriptors of QSAR
8.	Chempidder	Opensource	<i>ChemSpider</i> is a free chemical structure database providing fast text and structure search access to over 100 million structures from hundreds of data sources.
