

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 23 Pharm. D

SUBJECT NAME & CODE	CODE	COURSE OUTCOMES
est war again and a grant	C101.1	To understand basic concepts of elementary tissues and study about basic terminologies used in anatomy and physiology
	C101.2	To understand in detail about blood and its components, lymphatic system and heart rate regulation.
Human Anatomy and Physiology 101 T	C101.3	To learn the basis of various homeostatic mechanism and their imbalances
Filysiology 101 1	C101.4	To interpret the physiology of central nervous system and urinary sysyem
	C101.5	Discuss the interlinked mechanisms in the maintainance of normal functioning of human body
	C101.6	Understand the effect of skeletal muscle and sports physiology
	C102.1	Basic knowledge about development of pharmacy profession, pharmaceutical industry and various types of dosage form. prescription and its handling, posoogy and some basic calsulations oof dosage with respect to various patients.
	C102.2	Kowledge on the pharmcopoeias and pharmaceutial calculations that are involved in the formulatin of various dosage forms
Pharmaceutics 102 T	C102.3	Formulation and evaluation of powders and granules and variosu mnophasic liquid dosage forms
	C102.4	knowledge on Formulation and evaluation of biphasic liquid dosage forms and semisoid dosage forms such as suppositories including the calculations on displacement value and various extraction methods
	C102.5	basic knowledge on surgical aids and various pharmaceutical incompatibilities.
Medicinal Biochemistry 103 T	C103.1	Describes the cell organization, catalytic activity of enzymes and importance of isoenzymes in diagnosis of diseases.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 23 Pharm. D

	C103.2	Illustrates the metabolic process of biomolecules in health and illness (metabolic disorders).
	C103.3	Explains the genetic organization of mammalian genome; protein synthesis; replication; mutation and repair mech
	C103.4	Describe the biochemical principles of organ function tests of kidney, liver and endocrine gland.
	C103.5	Demonstrate the qualitative analysis and determination of biomolecules in the body fluids.
	C104.1	Summarize the naming reactions of carbonyl compounds and special emphasis on mechanisms and orientation of chemical reactions
The second of th	C104.2	Understaning of kinetics, mechanism, stereochemistry of free radical, electrophilic, nucleophilic addition reactions and theory of resonance
Pharmaceutical Organic	C104.3	Comparison of reactivity, orientation and factors influencing aliphatic nucleophilic substitution with aromatic nucleophilic substitution
Chemistry 104 T	C104.4	Discussion on the method of preparation, test for purity, assay and medicinal uses of selected organic compounds
	C104.5	Acquire the ability to assign systematic names to simple organic compounds and those with multiple functional groups.
	C104.6	Become proficient in experimental techniques, procedures, and safe laboratory practices and acquire the knowledge and understanding of the basic experimental principles of pharmaceutical organic chemistry.
	C105.1	Understand basic concepts of organic chemistry
Pharmaceutical Inorganic Chemistry 105 T	C105.2	Summarize the naming reactions of carbonyl compounds and special emphasis on mechanisms and orientation of chemical reactions

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India
Course Outcomes (CO's)
R 23 Pharm. D

	C105.3	Analysis of kinetics, mechanism, stereochemistry of free radical, electrophilic, nucleophilic addition reactions and theory of resonance
	C105.4	Comparison of reactivity, orientation and factors influencing aliphatic nucleophilic substitution with aromatic nucleophilic substitution
	C105.5	Discussion on the method of preparation, test for purity, assay and medicinal uses of selected organic compounds
	C105.6	Remember IUPAC rules for nomenclature of organic compounds and Identification of the structures of a gi+ven organic compound and nomenclature
	C106.1 A	Know the theory and their application in Pharmacy
Remedial Mathematics 106	C106.2 A	Solve the different types of problems by applying theory
T (A)	C106.3 A	Appreciate the important application of mathematics in Pharmacy
	C106.4 A	Apply both conventional and creative techniques to the solutions of mathematical problems
The part of the pa	C106.1 B	Understand the basic components, both anatomy and physiology of plants.
	C106.2 B	Identify and understand the Physiology and reproduction in plants.
Remedial Biology 106 T (B)	C106.3 B	Understand the taxonomy in plants.
remediat Biology 100 1 (b)	C106.4 B	Identify and understand the various tissue systems and cell organization in animals.
	C106.5 B	Classify and study about different animal classes especially reptiles, aves, pisces and mammals.
the transfer of the figure of the	C107.1	Identify the various tissues of the human body
Human Anatomy and	C107.2	Perform the hematological tests
Physiology 107 P	C107.3	Record blood pressure and simple muscle curve
	C107.4	Study of various systems of the human body
Pharmaceutics 108 P	C108.1	Aware of preparation of monophasic liquid dosage

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India
Course Outcomes (CO's)
R 23 Pharm. D

		forms such as syrups, elixirs, linctus, solutions liniments, and the science behind the slection of sutable excipient and their procedure involved.
	C108.2	The student is aware of the formulation, preparation of biphasic liquid dosage forms such as suspensions, and emulsions and their methodology involved.
	C108.3	The srudent is aware of the various type of poweders such as eutectoc, explosive and deliquescent and their preparation methods including the excipient specificatins for manufacturing
	C108.4	The student is aware of the semisolid dosage forms such as suppositiries including the selction of base and their manufacturing methodologies
	C108.5	The student is aware of the variosu pharmceutical incompatibioities and the methdologies to over come them.
	C109.1	Employs the qualitative analysis of urine sample for normal and abnormal constituents.
M. I. J. Division	C109.2	Experiments on blood sample helps the students to know the various parameters that are related to health and disease conditions.
Medicinal Biochemistry 109 P	C109.3	Examining the biological samples for clinical significance of blood sugar, creatinine, cholesterol like samples gives practil knowledge to the students.
	C109.4	Describes about the enzymatic tests like SGOT, SGPT and enzyme kinetic tests.
	C110.1	Acquire the knowledge and understanding of the basic experimental principles of pharmaceutical organic chemistry.
Pharmaceutical Organic Chemistry 110 P	C110.2	Apply stereo models and explain the structural aspects of organic compounds.
	C110.3	Identify various classes of organic compounds by systematic qualitative analysis, outline the preliminary tests and detection of elements for qualitative analysis.
	C110.4	Make correct use of various equipment's and

ANNAMACHARYA COLLEGE OF PHARMACY

(AUTONOMOUS)

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 23 Pharm. D

		take safety measures while working in Chemistry Laboratory.
	C110.5	Synthesize simple organic compounds by different organic reactions.
	C110.6	Analyze the appropriate method for purification of organic compounds.
	C111.1	Analyse the purity of compound quantitatively by performing assays
	C111.2	Identify the impurities in given inorganic compounds by performing limit tests
Pharmaceutical Inorganic	C111.3	Apply different methods to prepare inorganic pharmaceuticals.
Chemistry 111 P	C111.4	Carryout identification tests as per Indian Pharmacopoeia
	C111.5	Determine the impurities qualitatively by performing test for purity
	C111.6	Estimation of pharmaceutical inorganic compounds by gravimetry
	C112.1	Construct and develop microscopic sections of parts of the plant.
Remedial Biology 112 P	C112.2	Identify and study different animal specimen.
	C112.3	Various systems of frog using computer model.
	CAC01.1	Define communication and identify different communication styles.
	CAC01.2	Discuss the communication theory with example.
Communication Skills Lab (Audit Course)	CAC01.3	Apply Verbal and Non Verbal communication techniques in Professional environment.
AC01 P	CAC01.4	Demonstrate ability to interpret texts and observe the rules of effective writing
	CAC01.5	Prepare and present effective presentations.
	CAC01.6	Interview handling skills and effective writing

SUBJECT NAME & CODE	CODE	COURSE OUTCOMES
931 - L. y - E	C201.1	Apply the knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications.
	C201.2	Evaluate the basic Pathophysiological mechanisms in various diseases.
	C201.3	Explain the etiopathogenesis of selective diseases.
Pathophysiology 201 T	C201.4	Discuss the pathogenesis and morphology of reversible and irreversible cell injury.
	C201.5	Describe various lipoproteins and lipoprotein disorders, with acute and chronic inflammation, cancer, auto immune diseases with biological significance of hypersensitivity disorders.
	C201.6	Execute the baseline knowledge and application in other subject of pharmacy.
	C202.1	Explains the anatomy, identification, growth factors and sterilization of microorganisms.
	C202.2	Describes the mode of transmission of disease causing microorganism, symptoms of disease and treatment aspect.
Pharmaceutical Microbiology 202 T	C202.3	Illustrates the cultivation and identification methods of the microorganisms in the laboratory.
- * *(£ * + 7 = 1 *)	C202.4	Demonstrates the identification of diseases by performing the diagnostic test.
er o lawrence transfer of	C202.5	Describes the behavior of motility and behavioral characteristics of microorganisms.
	C203.1	Describe the history and scope of pharmaconosy and identify the cell wall constituents and cel inclusions.
	C203.2	Know the cultivation, collection, processing storage of medicinal plants.
Pharmacognosy &Phytopharmaceuticals	C203.3	Discuss regarding natural pesticides and their sources and describe the various plant fibers used in surgical dressing and related products.
203 T	C203.4	Learn the pharmacognosy and chemistry of carbohydrates, lipids, proteins and elaborate or their sources.
	C203.5	Learn the Microscopical and powder microscopical study of crude drugs.
	C203.6	Enumerate the role of medicinal plants in the

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

p e ⁻¹		identification of adulteration and contamination of herbal medicines and determine the adulteration in crude drug.
	C204.1	Demonstrate the basics of pharmacodynamics, adverse reaction, drug interaction and drug discovery.
2 25 J	C204.2	Explain the role of neurohumoral transmission and drugs acting on peripheral nervous system.
Pharmacology-I 204 T	C204.3	Distinguish the function of neurotransmitters and drugs acting on central nervous system.
> 1	C204.4	Identify the role of autocoids and related drugs.
	C204.5	Classify and explain the pharmacology of drugs acting on various systems.
	C204.6	Explain the physiological role of sex hormones and to assess the effect of oral contraceptives.
	C205.1	Discuss the roles and responsibilities of community pharmacist.
	C205.2	Outline the layout and infrastructure requirements for community pharmacy.
Community Pharmacy 205	C205.3	Recognize the need of inventory control and discuss the various methods.
not control Process of the	C205.4	Discuss the factors affecting medication adherence.
	C205.5	Perform general patient counseling.
	C205.6	Apply health screening services in community pharmacy.
	C206.1	The Pathophysiology of selected disease states and the rationale for drug therapy. And therapeutic approach to management of these diseases.
Pharmacotherapeutics-I 206 T	C206.2	The controversies in drug therapy; The importance of preparation of individualized therapeutic plans based on diagnosis; Needs to identify the patient-specific parameters relevant in initiating drug therapy and monitoring therapy (including alternatives, time-course of clinical and laboratory indices of therapeutic response and adverse effects).
	C206.3	Describe the Pathophysiology of selected disease states and explain the rationale for drug therapy.
	C206.4	Summarize the therapeutic approach to

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		management of these diseases including reference to the latest available evidence; discuss the controversies in drug therapy.
	C206.5	Explain the general prescribing guidelines and rational use of drugs.
	C206.6	Recognize the role of pharmacist in essential and rational drug use.
	C207.1	Explains the sterilization and disinfection methods for the control of micro-organisms.
Pharmaceutical	C207.2	Examination of microbes by staining techniques helps to identify the different types of microorganisms.
Microbiology 207 P	C207.3	Biochemical tests employs in study of cultural characteristic features of microbes.
	C207.4	Diagnostic tests like widal tests give experimental knowledge to the students on diagnosis of diseases.
Pharmacognosy	C208.1	Experiment macroscopicalµscopical characters of few pharmacognostically important crude drugs with neat labeled diagrams. Examine the powder microscopy of few crude drugs with well demonstrated diagrams.
&Phytopharmaceuticals208 P	C208.2	Able to identify compound by performing chemical test.
	C208.3	Determine the chemical parameters of few oils that is of pharmacognostic significance.
Anuncu Co gardwana	C208.4	Enumerate and list the cell contents and cell inclusions in a plant.
A CONTRACTOR OF THE PARTY OF TH	C209.1	Discuss the controversies in drug therapy.
from the parties and the	C209.2	Discuss the preparation of individualised therapeutic plans based on diagnosis.
Pharmacotherapeutics-I 209 P	C209.3	Identify the patient-specific parameters relevant in initiating drug therapy.
	C209.4	Monitoring of drug therapy (including alternatives, timecourse of clinical and laboratory indices of therapeutic response and adverse effects).
	C209.5	Discuss the therapeutic approach to management of selected diseases.
J	C209.6	Perform patient counselling and Conduct planned experiments and prepare laboratory

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

100		report in a standard format.
4.5	C301.1	Identify the pharmacological aspects of various drugs.
	C301.2	Review the experiments confidently.
Dharmanalagy II 201 T	C301.3	Reproduce the importance of pharmacology subject as a basis of therapeutics.
Pharmacology-II 301 T	C301.4	Duplicate the knowledge therapeutically.
	C301.5	Describe the pharmacokinetic and pharmacodynamic principles in pharmacology.
and the street of the	C301.6	List the drugs in chemotherapyof various diseases.
	C302.1	Understand the importance of Regulatory authorities like GLP, ISO, TQM and Validation Guidelines involved in Pharmaceutical Analysis and various methods to ensure the Quality assurance of Drug and formulation.
	C302.2	Discuss the Application of Chromatography technique like TLC, Paper Chromatography and Electrophoresis used in analysis of Pharmaceuticals.
Pharmaceutical Analysis	C302.3	Examine the application of electrometric method utilized in analysis of drugs and Pharmaceuticals.
302 T	C302.4	Illustrate the Principle, Instrumentation and application of various spectroscopic techniques involved in Analysis of Drug and Pharmaceuticals.
	C302.5	Instruct theoretical knowledge on various hyphenated instrumental techniques adopted for analysis of Pharmaceuticals.
	C302.6	Describe the fundamental principles and applications of Flame photometry, X-ray diffraction, atomic emission and atomic absorption spectroscopy.
Pharmacotherapeutics-II 303 T	C303.1	To know the pathophysiology of selected disease states and the rationale for drug therapy.
	C303.2	To understand the therapeutic approach formanagement of different diseases.
	C303.3	To know the importance of preparation o individualized therapeutic plans based or diagnosis & controversies in drug therapy.
	C303.4	To understand & identify the patient-specific

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		parameters relevant in initiating drug therapy, and monitoring therapy.
	C303.5	Explain the etiopathogenesis of selected infectious diseases, musculoskeletal and renal disorders.
	C303.6	Discuss the principles of cancer therapy and dermatological disorders.
	C304.1	Acquire the basic knowledge about pharmaceutical laws and role of ethics in pharmacy profession in India.
	C304.2	Memorize and explain the provisions of actspertaining to Drugs and Cosmetics Act and Narcotic Drugs & Psychotropic Substance Act.
Pharmaceutical Jurisprudence 304 T	C304.3	Describe the concepts of price fixation of pharmaceutical products.
Services of the Health of the services of the Health of the services of the se	C304.4	Implement the rules and regulations of M&TP (Excise Duties) Act and Drugs and Magic remedies Act.
The state of the second	C304.5	Summarize the Pharmaceutical Acts and Laws and their implications in the development andmarketing of pharmaceuticals.
moved the bester stifts show to	C305.1	Understand the chemistry of drugs with respect to their pharmacological activity.
	C305.2	Analyze how current drugs were developed by using pharmacophore modeling and docking technique.
	C305.3	Know the structural activity relationship of different class of drugs.
Medicinal Chemistry 305 T	C305.4	Acquire knowledge in the chemotherapy for cancer and microbial diseases and different anti-viral agents.
in the common for the control of the	C305.5	Relate the knowledge of the chemistry of drugs with respect to their pharmacological activity, mode of action & adverse effect.
	C305.6	Interpret the concept of rational drug design including combinatorial chemistry and computer aided drug design.
Pharmaceutical Formulations 306 T	C306.1	Explain the significance of formulation, preparation and evaluation of various pharmaceutical dosage forms.
Formulations 306 1	C306.2	Describe formulation additives for various dosage forms.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India
Course Outcomes (CO's)
R 17 Pharm. D

	C306.3	Explain suitable measures for stability of the dosage forms.
	C306.4	Describe the manufacturing methods of solid, semisolid, parenteral and ophthalmic products.
	C306.5	Evaluate different dosage forms with appropriate quality control test for a given drug.
	C306.6	Assess suitable packaging material for a dosage form of a given drug Pharmaceuticals.
	C307.1	Identify the drugs confidently in experiments.
	C307.2	Interpret the experiments of pharmacology.
Pharmacology-II 307 P	C307.3	Identify the various techniques in pharmacology experiments.
	C307.4	Interpret the results of biological samples in experimental pharmacology.
The state of the s	C307.5	Demonstrate the pharmacological experiments.
	C308.1	Perform quantitative & qualitative analysis of drugs using various analytical instruments like UV-visible and IR spectrophotometer.
Pharmaceutical Analysis	C308.2	Interpret spectra of UV-visible, IR, NMR and Mass to identity the given compound.
308 P	C308.3	Compare spectral data with chemical structure.
v page I are v o	C308.4	Evaluate the quantity of a drug in a given mixture or solution.
	C308.5	Practice planned experiments and prepare laboratory report in a standard format.
	C309.1	To understand therapeutic goals of the drugs used in different diseases.
	C309.2	· To understand dose and frequency of the medications.
Pharmacotherapeutics-II 309 P	C309.3	· To understand the time-course of clinical and laboratory indices of therapeutic response and adverse effects.
	C309.4	Identify adverse drug reactions, drug interactions and rationalize the prescription.
	C309.5	Prepare individualized therapeutic plans based on diagnosis.
	C309.6	Perform patient counseling.
Medicinal Chemistry 310 P	C310.1	Make correct use of various equipment's and take safety measures while working in Medicinal Chemistry Laboratory.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

-	C310.2	Synthesize medicinally important compounds.
	C310.3	Apply and understand the reaction mechanisms involved in synthesis of medicinally important compound.
- A14	C310.4	Conduct monograph analysis of the pharmaceutical compounds and determination of the amount of drug present.
	C310.5	Determine partition coefficient and dissociation constant of a given compound.
. 1 1 551 535 6 E	C310.6	Gains knowledge on purification of the synthesized medicinal compound by using appropriate techniques.
The second of the second	C311.1	Develop formulations of different dosage forms as per the batch formula,
The state of the s	C311.2	Demonstrate different equipment's and instruments used in preparation of dosage forms
Pharmaceutical	C311.3	Select suitable packaging container for a dosage form.
Formulations 311 P	C311.4	Evaluate different dosage forms by performing quality control tests.
	C311.5	Prepare and evaluate cosmetics such as lipstick, cold cream and shampoo.
	C311.6	Design planned experiments and prepare laboratory report in a standard format.
. soft on sent to meetic	C401.1	Explain the etiopathogenesis of selected gastrointestinal, haematological, neurological and psychiatric diseases.
	C401.2	Discuss the principles of evidence-based therapy and pain management.
Pharmacotherapeutics-III	C401.3	Identify the patient-specific parameters relevant in initiating and monitoring drug therapy and adverse effects.
401 T	C401.4	Discuss the therapeutic approach in the management of selected diseases and controversies in drug therapy.
	C401.5	Prepare individualized therapeutic plans based on diagnosis.
	C401.6	Recognize the role of pharmacist in essential and rational drug use.
Hospital Pharmacy 402 T	C402.1	Discuss the roles and responsibilities of hospital pharmacist, hospital drug policies and

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		guidelines for hospital pharmacy.
· · · · · · · · · · · · · · · · · · ·	C402.2	Discuss various drug distribution methods in a hospital pharmacy.
	C402.3	Apply various methods of inventory control.
	C402.4	Formulate parenteral preparations.
	C402.5	Review a newsletter for providing continuous education and awareness.
or or i	C402.6	Explain about handling and packaging of radiopharmaceuticals.
	C403.1	Explain the roles and responsibilities of clinical pharmacist.
	C403.2	Analyze and interpret the laboratory test results for clinical diagnosis.
Clinical Pharmany	C403.3	Conduct interview to elicit medication history and perform patient counseling.
Clinical Pharmacy 403 T	C403.4	Identify, monitor, assess, manage, prevent, document and report suspected adverse drug reactions.
	C403.5	Provide drug and poison information through critical analysis.
in the provided officer of the same and one or or or or	C403.6	Recognize the potential sources of medication errors and act for its prevention.
	C404.1	Choose the appropriate research design and develop appropriate research hypothesis for a research project.
Biostatistics & Research	C404.2	Explain the concept of central tendency of data & describe the different measures of central tendency.
Methodology 404 T	C404.3	Describe the appropriate statistical methods required for a particular research design.
	C404.4	Understand the basic epidemiological methods and study designs.
	C404.5	Explain the applications of computer in Hospital and Community Pharmacy.
Biopharmaceutics & Pharmacokinetics 405 T	C405.1	Understand the concept of ADME of a drug in the human body and factors influencing them.
	C405.2	Explain the introductory aspects of pharmacokinetics.
	C405.3	Determine the various pharmacokinetic parameters from either plasma concentration or urinary excretion data of the drug for a drug

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		following one and multi compartment models.
	C405.4	Summarize the concept of multiple-dose administration and identify the various causes of the nonlinear pharmacokinetics.
	C405.5	Describe the concept of non-compartmental pharmacokinetics and state the principles underlying Bioavailability and Bioequivalence studies.
	C406.1	Developing general working knowledge of the principles and management of clinical toxicology.
	C406.2	Generalized understanding of the health implications of toxic exposure involving therapeutic and non therapeutic agents.
Clinical Toxicology 406 T	C406.3	Examine previous history, assessment, and therapy considerations associated with the management of a toxic exposure.
	C406.4	Distinguishing the characteristics and treatment guidelines for specific toxic substances.
. control baselesses	C406.5	Implementing several preventive approaches to reduce unintentional poisoning.
	C407.1	Identify drug interactions and rationalize the prescription.
	C407.2	Discuss the therapeutic approach to management of selected diseases.
Pharmacotherapeutics-III 407 P	C407.3	Prepare individualized therapeutic plans based on diagnosis.
and the same states	C407.4	Conduct patient counseling.
r in the habit is not taken your major is and stope	C407.5	Conducts planned experiments and prepare laboratory report in a standard format.
The state of	C408.1	Analyze prescriptions for drug interaction.
	C408.2	Develop and prepare parenteral formulations and powders.
II::4-1 Db	C408.3	Solve inventory analysis.
Hospital Pharmacy 408 P	C408.4	Solve drug information queries through literature search.
	C408.5	Conduct planned experiments and prepares laboratory report in a standard format.
	C408.6	Produce various preparations used in hospital.
Clinical Pharmacy	C409.1	Assess prescriptions for drug interaction and

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

409 P		answer drug information query.
	C409.2	Perform patient counseling on medication and conduct medication history interview.
1 1	C409.3	Analyze and interpret the data obtained through laboratory tests.
	C409.4	Conducts planned experiments and prepare laboratory report in a standard format.
	C410.1	Compare the in-vitro drug release profile of different marketed products and perform the solubility enhancement techniques for improvement of drug release of poorly water soluble drugs.
Biopharmaceutics & Pharmacokinetics	C410.2	Estimate the bioavailability (absolute and relative) and bioequivalence from the given clinical data.
410 P	C410.3	Calculate the drug content in blood sample using Area Under Curve approach and interpret various pharmacokinetic parameters from the given clinical data.
. To all a caleba	C410.4	Conducts planned experiments and prepare laboratory report in a standard format.
2,500 0000000000000000000000000000000000	C411.1	Explain the etiopathogenesis of selected diseases.
a,	C411.2	Prepare individualized therapeutic plans based on diagnosis.
Pharmacotherapeutics I & II	C411.3	Recognize the role of pharmacist in essential and rational drug use.
411 T	C411.4	Explain the general prescribing guidelines and rational use of drugs.
	C411.5	Discuss the therapeutic approach in the management of selected diseases and controversies in drug therapy.
2 2 2	C412.1	Identify drug interactions and rationalize the prescription.
Pharmacotherapeutics I & II	C412.2	Discuss the therapeutic approach to management of selected diseases.
412 P	C412.3	Prepare individualized therapeutic plans based on diagnosis.
	C412.4	Conduct patient counseling.
Clinical Research 501 T	C501.1	Discuss the Pharmacological and Toxicological considerations in process of development of new drugs.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

	C501.2	Discuss the principles and phases in clinical trial of drug.
91	C501.3	Explain the guidelines for ethics and safe monitoring in clinical trial of a drug.
	C501.4	Design the documents of clinical trial.
	C501.5	Distinguish the guidelines of national and international regulatory bodies for clinical trial.
	C501.6	Recognize differing roles and obligations of the Investigator, Sponsor and Institutional Review Board.
	C502.1	Discuss the scope, need, origin and evaluation of Pharmacoepidemiology.
	C502.2	Explain the importance of Measurement of outcomes in Pharmacoepidemiology.
	C502.3	Recommend suitable method for measuring the outcome of Pharmacoepidemiology for a disease.
Pharmacoepidemiology and Pharmacoeconomics 502 T	C502.4	Suggest an appropriate Pharmacoepidemiological method for a given drug and address the risks associated with Pharmacoepidemiological study.
	C502.5	Discuss the basic principles, role and relevance of Pharmacoeconomics in the development of a new drug.
	C502.6	Identify and justify an appropriate evaluation method for Pharmacoeconomics study of a disease.
	C503.1	Discuss the pharmacokinetic principles to individualize drug therapy in patient care situations.
Clinical Pharmacokinetics	C503.2	Determine dose, dosing intervals and dosage adjustments of a drug for a given patient.
&Pharmacotherapeutic Drug Monitoring 503 T	C503.3	Apply the principles of pharmacokinetics to analyze and predict drug interactions.
	C503.4	Prepare protocol for TDM of drugs for selected diseases.
	C503.5	Discuss the concept of genetic polymorphism in metabolism, transport and target of a drug.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

SUBJECT NAME & CODE	CODE	COURSE OUTCOMES
	C201.1	Apply the knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications.
- and an out the second	C201.2	Evaluate the basic Pathophysiological mechanisms in various diseases.
A STATE OF THE STA	C201.3	Explain the etiopathogenesis of selective diseases.
Pathophysiology 201 T	C201.4	Discuss the pathogenesis and morphology of reversible and irreversible cell injury.
	C201.5	Describe various lipoproteins and lipoprotein disorders, with acute and chronic inflammation, cancer, auto immune diseases with biological significance of hypersensitivity disorders.
	C201.6	Execute the baseline knowledge and application in other subject of pharmacy.
	C202.1	Explains the anatomy, identification, growth factors and sterilization of microorganisms.
1 to 1 min 1 X and 1 min 1 X and 1 min 1 X and 1 min 1	C202.2	Describes the mode of transmission of disease causing microorganism, symptoms of disease and treatment aspect.
Pharmaceutical Microbiology 202 T	C202.3	Illustrates the cultivation and identification methods of the microorganisms in the laboratory.
and the same of the	C202.4	Demonstrates the identification of diseases by performing the diagnostic test.
produce of the same succession	C202.5	Describes the behavior of motility and behavioral characteristics of microorganisms.
Agricultural designation of the second secon	C203.1	Describe the history and scope of pharmaconosy and identify the cell wall constituents and cel inclusions.
	C203.2	Know the cultivation, collection, processing storage of medicinal plants.
Pharmacognosy &Phytopharmaceuticals 203 T	C203.3	Discuss regarding natural pesticides and their sources and describe the various plant fibers used in surgical dressing and related products.
	C203.4	Learn the pharmacognosy and chemistry of carbohydrates, lipids, proteins and elaborate or their sources.
	C203.5	Learn the Microscopical and powder microscopical study of crude drugs.
	C203.6	Enumerate the role of medicinal plants in the

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		identification of adulteration and contamination of herbal medicines and determine the adulteration in crude drug.
	C204.1	Demonstrate the basics of pharmacodynamics, adverse reaction, drug interaction and drug discovery.
The second of th	C204.2	Explain the role of neurohumoral transmission and drugs acting on peripheral nervous system.
Pharmacology-I 204 T	C204.3	Distinguish the function of neurotransmitters and drugs acting on central nervous system.
	C204.4	Identify the role of autocoids and related drugs.
	C204.5	Classify and explain the pharmacology of drugs acting on various systems.
	C204.6	Explain the physiological role of sex hormones and to assess the effect of oral contraceptives.
Still a way Salay a real of a	C205.1	Discuss the roles and responsibilities of community pharmacist.
provide the superior of the	C205.2	Outline the layout and infrastructure requirements for community pharmacy.
Community Pharmacy 205	C205.3	Recognize the need of inventory control and discuss the various methods.
results definitioned by the second suggestion of the second secon	C205.4	Discuss the factors affecting medication adherence.
	C205.5	Perform general patient counseling.
xt xt 2 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3	C205.6	Apply health screening services in community pharmacy.
	C206.1	The Pathophysiology of selected disease states and the rationale for drug therapy. And therapeutic approach to management of these diseases.
Pharmacotherapeutics-I 206 T	C206.2	The controversies in drug therapy; The importance of preparation of individualized therapeutic plans based on diagnosis; Needs to identify the patient-specific parameters relevant in initiating drug therapy and monitoring therapy (including alternatives, time-course of clinical and laboratory indices of therapeutic response and adverse effects).
regions to the second	C206.3	Describe the Pathophysiology of selected disease states and explain the rationale for drug therapy.
	C206.4	Summarize the therapeutic approach to

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		management of these diseases including reference to the latest available evidence; discuss the controversies in drug therapy.
	C206.5	Explain the general prescribing guidelines and rational use of drugs.
	C206.6	Recognize the role of pharmacist in essential and rational drug use.
	C207.1	Explains the sterilization and disinfection methods for the control of micro-organisms.
Pharmaceutical	C207.2	Examination of microbes by staining techniques helps to identify the different types of microorganisms.
Microbiology 207 P	C207.3	Biochemical tests employs in study of cultural characteristic features of microbes.
	C207.4	Diagnostic tests like widal tests give experimental knowledge to the students on diagnosis of diseases.
Pharmacognosy	C208.1	Experiment macroscopicalµscopical characters of few pharmacognostically important crude drugs with neat labeled diagrams. Examine the powder microscopy of few crude drugs with well demonstrated diagrams.
&Phytopharmaceuticals208	C208.2	Able to identify compound by performing chemical test.
	C208.3	Determine the chemical parameters of few oils that is of pharmacognostic significance.
er souther are made or services	C208.4	Enumerate and list the cell contents and cell inclusions in a plant.
A. arenes	C209.1	Discuss the controversies in drug therapy.
and various and	C209.2	Discuss the preparation of individualised therapeutic plans based on diagnosis.
Pharmacotherapeutics-I 209 P	C209.3	Identify the patient-specific parameters relevant in initiating drug therapy.
	C209.4	Monitoring of drug therapy (including alternatives, timecourse of clinical and laboratory indices of therapeutic response and adverse effects).
	C209.5	Discuss the therapeutic approach to management of selected diseases.
	C209.6	Perform patient counselling and Conduct planned experiments and prepare laboratory

		report in a standard format.
	C301.1	Identify the pharmacological aspects of various drugs.
	C301.2	Review the experiments confidently.
Pharmacology II 301 T	C301.3	Reproduce the importance of pharmacology subject as a basis of therapeutics.
Pharmacology-II 301 T	C301.4	Duplicate the knowledge therapeutically.
e is a second	C301.5	Describe the pharmacokinetic and pharmacodynamic principles in pharmacology.
	C301.6	List the drugs in chemotherapyof various diseases.
	C302.1	Understand the importance of Regulatory authorities like GLP, ISO, TQM and Validation Guidelines involved in Pharmaceutical Analysis and various methods to ensure the Quality assurance of Drug and formulation.
	C302.2	Discuss the Application of Chromatography technique like TLC, Paper Chromatography and Electrophoresis used in analysis of Pharmaceuticals.
Pharmaceutical Analysis	C302.3	Examine the application of electrometric method utilized in analysis of drugs and Pharmaceuticals.
302 T	C302.4	Illustrate the Principle, Instrumentation and application of various spectroscopic techniques involved in Analysis of Drug and Pharmaceuticals.
	C302.5	Instruct theoretical knowledge on various hyphenated instrumental techniques adopted for analysis of Pharmaceuticals.
	C302.6	Describe the fundamental principles and applications of Flame photometry, X-ray diffraction, atomic emission and atomic absorption spectroscopy.
Pharmacotherapeutics-II 303 T	C303.1	To know the pathophysiology of selected disease states and the rationale for drug therapy.
	C303.2	To understand the therapeutic approach formanagement of different diseases.
	C303.3	To know the importance of preparation of individualized therapeutic plans based on diagnosis & controversies in drug therapy.
	C303.4	To understand & identify the patient-specific

ANNAMACHARYA COLLEGE OF PHARMACY

(AUTONOMOUS)

		parameters relevant in initiating drug therapy, and monitoring therapy.
	C303.5	Explain the etiopathogenesis of selected infectious diseases, musculoskeletal and renal disorders.
	C303.6	Discuss the principles of cancer therapy and dermatological disorders.
	C304.1	Acquire the basic knowledge about pharmaceutical laws and role of ethics in pharmacy profession in India.
	C304.2	Memorize and explain the provisions of actspertaining to Drugs and Cosmetics Act and Narcotic Drugs & Psychotropic Substance Act.
Pharmaceutical Jurisprudence 304 T	C304.3	Describe the concepts of price fixation of pharmaceutical products.
Proposed actions in the State of the State o	C304.4	Implement the rules and regulations of M&TP (Excise Duties) Act and Drugs and Magic remedies Act.
e ja mega spila sala. Salah salah salah	C304.5	Summarize the Pharmaceutical Acts and Laws and their implications in the development andmarketing of pharmaceuticals.
	C305.1	Understand the chemistry of drugs with respect to their pharmacological activity.
	C305.2	Analyze how current drugs were developed by using pharmacophore modeling and docking technique.
and the same and	C305.3	Know the structural activity relationship of different class of drugs.
Medicinal Chemistry 305 T	C305.4	Acquire knowledge in the chemotherapy for cancer and microbial diseases and different anti-viral agents.
ten watch the transcript	C305.5	Relate the knowledge of the chemistry of drugs with respect to their pharmacological activity, mode of action & adverse effect.
grande de la como galent La disensión de del del del del Recolo del	C305.6	Interpret the concept of rational drug design including combinatorial chemistry and computer aided drug design.
Pharmaceutical Formulations 306 T	C306.1	Explain the significance of formulation, preparation and evaluation of various pharmaceutical dosage forms.
	C306.2	Describe formulation additives for various dosage forms.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

į.	C306.3	Explain suitable measures for stability of the dosage forms.
	C306.4	Describe the manufacturing methods of solid, semisolid, parenteral and ophthalmic products.
	C306.5	Evaluate different dosage forms with appropriate quality control test for a given drug.
	C306.6	Assess suitable packaging material for a dosage form of a given drug Pharmaceuticals.
	C307.1	Identify the drugs confidently in experiments.
	C307.2	Interpret the experiments of pharmacology.
Pharmacology-II 307 P	C307.3	Identify the various techniques in pharmacology experiments.
	C307.4	Interpret the results of biological samples in experimental pharmacology.
the second section	C307.5	Demonstrate the pharmacological experiments.
The state of the second and the seco	C308.1	Perform quantitative & qualitative analysis of drugs using various analytical instruments like UV-visible and IR spectrophotometer.
Pharmaceutical Analysis	C308.2	Interpret spectra of UV-visible, IR, NMR and Mass to identity the given compound.
308 P	C308.3	Compare spectral data with chemical structure.
V. Co. Livera acres equals	C308.4	Evaluate the quantity of a drug in a given mixture or solution.
	C308.5	Practice planned experiments and prepare laboratory report in a standard format.
	C309.1	To understand therapeutic goals of the drugs used in different diseases.
The first of the second of the	C309.2	· To understand dose and frequency of the medications.
Pharmacotherapeutics-II 309 P	C309.3	· To understand the time-course of clinical and laboratory indices of therapeutic response and adverse effects.
	C309.4	Identify adverse drug reactions, drug interactions and rationalize the prescription.
- 10 July 10	C309.5	Prepare individualized therapeutic plans based on diagnosis.
Kirk to mining	C309.6	Perform patient counseling.
Medicinal Chemistry 310 P	C310.1	Make correct use of various equipment's and take safety measures while working in Medicinal Chemistry Laboratory.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

=	C310.2	Synthesize medicinally important compounds.
X	C310.3	Apply and understand the reaction mechanisms involved in synthesis of medicinally important compound.
	C310.4	Conduct monograph analysis of the pharmaceutical compounds and determination of the amount of drug present.
	C310.5	Determine partition coefficient and dissociation constant of a given compound.
	C310.6	Gains knowledge on purification of the synthesized medicinal compound by using appropriate techniques.
	C311.1	Develop formulations of different dosage forms as per the batch formula,
1	C311.2	Demonstrate different equipment's and instruments used in preparation of dosage forms
Pharmaceutical Formulations 311 P	C311.3	Select suitable packaging container for a dosage form.
Formulations 311 P	C311.4	Evaluate different dosage forms by performing quality control tests.
	C311.5	Prepare and evaluate cosmetics such as lipstick, cold cream and shampoo.
	C311.6	Design planned experiments and prepare laboratory report in a standard format.
e serveres a signer e se	C401.1	Explain the etiopathogenesis of selected gastrointestinal, haematological, neurological and psychiatric diseases.
og einer, " i v p	C401.2	Discuss the principles of evidence-based therapy and pain management.
Pharmacotherapeutics-III 401 T	C401.3	Identify the patient-specific parameters relevant in initiating and monitoring drug therapy and adverse effects.
	C401.4	Discuss the therapeutic approach in the management of selected diseases and controversies in drug therapy.
	C401.5	Prepare individualized therapeutic plans based on diagnosis.
	C401.6	Recognize the role of pharmacist in essential and rational drug use.
Hospital Pharmacy 402 T	C402.1	Discuss the roles and responsibilities of hospital pharmacist, hospital drug policies and

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India
Course Outcomes (CO's)
R 17 Pharm. D

		guidelines for hospital pharmacy.
	C402.2	Discuss various drug distribution methods in a hospital pharmacy.
·	C402.3	Apply various methods of inventory control.
i a a a a a a a a a a a a a a a a a a a	C402.4	Formulate parenteral preparations.
	C402.5	Review a newsletter for providing continuous education and awareness.
	C402.6	Explain about handling and packaging of radiopharmaceuticals.
	C403.1	Explain the roles and responsibilities of clinical pharmacist.
	C403.2	Analyze and interpret the laboratory test results for clinical diagnosis.
Clinical Pharmacy	C403.3	Conduct interview to elicit medication history and perform patient counseling.
403 T	C403.4	Identify, monitor, assess, manage, prevent document and report suspected adverse drug reactions.
	C403.5	Provide drug and poison information through critical analysis.
process and the contraction was anticome of	C403.6	Recognize the potential sources of medication errors and act for its prevention.
	C404.1	Choose the appropriate research design and develop appropriate research hypothesis for a research project.
Biostatistics & Research	C404.2	Explain the concept of central tendency of data & describe the different measures of central tendency.
Methodology 404 T	C404.3	Describe the appropriate statistical methods required for a particular research design.
	C404.4	Understand the basic epidemiological methods and study designs.
	C404.5	Explain the applications of computer in Hospita and Community Pharmacy.
Biopharmaceutics & Pharmacokinetics 405 T	C405.1	Understand the concept of ADME of a drug in the human body and factors influencing them.
	C405.2	Explain the introductory aspects o pharmacokinetics.
	C405.3	Determine the various pharmacokinetic parameters from either plasma concentration of urinary excretion data of the drug for a drug

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

		following one and multi compartment models.
	C405.4	Summarize the concept of multiple-dose administration and identify the various causes of the nonlinear pharmacokinetics.
	C405.5	Describe the concept of non-compartmental pharmacokinetics and state the principles underlying Bioavailability and Bioequivalence studies.
	C406.1	Developing general working knowledge of the principles and management of clinical toxicology.
79 h	C406.2	Generalized understanding of the health implications of toxic exposure involving therapeutic and non therapeutic agents.
Clinical Toxicology 406 T	C406.3	Examine previous history, assessment, and therapy considerations associated with the management of a toxic exposure.
	C406.4	Distinguishing the characteristics and treatment guidelines for specific toxic substances.
	C406.5	Implementing several preventive approaches to reduce unintentional poisoning.
Pharmacotherapeutics-III 407 P	C407.1	Identify drug interactions and rationalize the prescription.
	C407.2	Discuss the therapeutic approach to management of selected diseases.
	C407.3	Prepare individualized therapeutic plans based on diagnosis.
	C407.4	Conduct patient counseling.
	C407.5	Conducts planned experiments and prepare laboratory report in a standard format.
Hospital Pharmacy 408 P	C408.1	Analyze prescriptions for drug interaction.
	C408.2	Develop and prepare parenteral formulations and powders.
	C408.3	Solve inventory analysis.
	C408.4	Solve drug information queries through literature search.
	C408.5	Conduct planned experiments and prepares laboratory report in a standard format.
	C408.6	Produce various preparations used in hospital.
Clinical Pharmacy	C409.1	Assess prescriptions for drug interaction and

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

409 P		answer drug information query.
	C409.2	Perform patient counseling on medication and conduct medication history interview.
	C409.3	Analyze and interpret the data obtained through laboratory tests.
	C409.4	Conducts planned experiments and prepare laboratory report in a standard format.
	C410.1	Compare the in-vitro drug release profile of different marketed products and perform the solubility enhancement techniques for improvement of drug release of poorly water soluble drugs.
Biopharmaceutics & Pharmacokinetics 410 P	C410.2	Estimate the bioavailability (absolute and relative) and bioequivalence from the given clinical data.
	C410.3	Calculate the drug content in blood sample using Area Under Curve approach and interpret various pharmacokinetic parameters from the given clinical data.
	C410.4	Conducts planned experiments and prepare laboratory report in a standard format.
Pharmacotherapeutics I & II 411 T	C411.1	Explain the etiopathogenesis of selected diseases.
	C411.2	Prepare individualized therapeutic plans based on diagnosis.
	C411.3	Recognize the role of pharmacist in essential and rational drug use.
	C411.4	Explain the general prescribing guidelines and rational use of drugs.
	C411.5	Discuss the therapeutic approach in the management of selected diseases and controversies in drug therapy.
La Pagago La Caración de	C412.1	Identify drug interactions and rationalize the prescription.
Pharmacotherapeutics I & II 412 P	C412.2	Discuss the therapeutic approach to management of selected diseases.
	C412.3	Prepare individualized therapeutic plans based on diagnosis.
	C412.4	Conduct patient counseling.
Clinical Research 501 T	C501.1	Discuss the Pharmacological and Toxicological considerations in process of development of new drugs.

New Boyanapalli, Rajampet, Annamayya Dist, A.P., India Course Outcomes (CO's) R 17 Pharm. D

	C501.2	Discuss the principles and phases in clinical trial of drug.
	C501.3	Explain the guidelines for ethics and safe monitoring in clinical trial of a drug.
	C501.4	Design the documents of clinical trial.
	C501.5	Distinguish the guidelines of national and international regulatory bodies for clinical trial.
	C501.6	Recognize differing roles and obligations of the Investigator, Sponsor and Institutional Review Board.
Pharmacoepidemiology and Pharmacoeconomics 502 T	C502.1	Discuss the scope, need, origin and evaluation of Pharmacoepidemiology.
	C502.2	Explain the importance of Measurement of outcomes in Pharmacoepidemiology.
	C502.3	Recommend suitable method for measuring the outcome of Pharmacoepidemiology for a disease.
	C502.4	Suggest an appropriate Pharmacoepidemiological method for a given drug and address the risks associated with Pharmacoepidemiological study.
	C502.5	Discuss the basic principles, role and relevance of Pharmacoeconomics in the development of a new drug.
	C502.6	Identify and justify an appropriate evaluation method for Pharmacoeconomics study of a disease.
Clinical Pharmacokinetics &Pharmacotherapeutic Drug Monitoring 503 T	C503.1	Discuss the pharmacokinetic principles to individualize drug therapy in patient care situations.
	C503.2	Determine dose, dosing intervals and dosage adjustments of a drug for a given patient.
	C503.3	Apply the principles of pharmacokinetics to analyze and predict drug interactions.
	C503.4	Prepare protocol for TDM of drugs for selected diseases.
	C503.5	Discuss the concept of genetic polymorphism in metabolism, transport and target of a drug.
